## Projects

### Pencils and Inks

Pencils and Inks is an e-commerce website that was developed from scratch using React & Next js for the client side and Ruby on Rails for the server API. The website includes various features such as; products, users, filter settings, a review system with ratings, a shopping cart, and an admin panel for CRUD operations.

### Webmarks

Webmarks is an online file system that allows users to store folders and urls on the web. The front end for this application was built using React and Material UI. The back end API was built using Node with Express, and the user authentication was handled with Passport.

### Skyline Media Marketing

Skyline is an advertisement agency located in New York. I worked with them on various projects for multiple clients, including their own main website. The website was designed in Figma, and built using React and Gatsby. After the creation of the website, the client experienced a 100%+ increase in leads from their marketing campaigns. It was a huge success.

## Work Experience

### Developer & Designer @ Skyline Management, Inc.

2019 – 2022 // Miami, FL
