Projects

Webmarks

Webmarks is an online file system that allows users to store folders and urls on the web. The Frontend for this application was built using React and Material UI. I built the Backend with Node js, Express and MongoDB as a database. User authentication was handled with Passport.

My Portfolio Website

My portfolio was built to showcase projects and information that you might want to know about me. It includes a download link to my CV, as well as a contact link connected to my email. This website was built with React and Gatsby, using Emotion JS for handling the CSS.

Sunshine Dental

Sunshine dental is a dentistry located in Valencia Shores Blvd. They do teeth cleanings, fillings & crowns, root canals, invisilign and more. I made this website using React and Gatsby with Styled Components for the CSS. I used Formik to create the contact form and it is hosted with Netlify.
